Diverse Product Selection

NEW & NEVER USED

We offer a comprehensive range of New and Never-Used products, selected to meet the evolving needs of modern industry. Each product is sourced from top manufacturers, ensuring reliability and quality, making Radwell your trusted partner for all of your industrial

SURPLUS

Our products include a diverse range of high-quality, cost-effective surplus products, including PLCs, HMIs, motors, drives, and electrical components ideal for budget-conscious businesses. These carefully sourced and inspected products are ideal for maintaining or upgrading systems, especially when dealing with discontinued or rare components.

OBSOLETE & REFURBISHED

We specialise in providing hard-to-find obsolete products, offering solutions for businesses needing old-generation automation and electronic parts to keep their existing machinery operational. These products help companies avoid expensive upgrades and extend the lifespan of legacy systems, making Radwell a vital partner for industries reliant on older technologies.

RADWELL VERIFIED SUBSTITUTES (RVS)

Radwell Verified Substitutes are form, fit and function replacements for original manufacturer's items and provide a significant cost savings. Our substitutes focus on quality and performance, while offering a cost-effective option for your plant floor. Choosing our substitutes enables substantial savings without compromising performance and dependability.
